DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a light source assembly, classified in class 700, subclass 300.
 - II. Claims 21-23, drawn to a semiconductor manufacturing method, classified in class 700, subclass 121.
 - III. Claim 24, drawn to a network for communicating machine status, classified in class 702, subclass 188.
 - IV. Claim 25, drawn to a semiconductor manufacturing machine maintenance method, classified in class 702, subclass 183.
2. The inventions are distinct, each from the other because of the following reasons:
 - a. Inventions I and II, III and IV are related as product and process of use.
 - b. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).
 - c. In the instant case, invention I is a lighting system applied in a semiconductor manufacturing apparatus. Inventions II, III and IV are methods or applications where said apparatus is used.

- i. Invention II applies the apparatus to manufacturing semiconductor devices. The product of group I is not required for this method.
 - ii. Invention III includes the device in a network of semiconductor manufacturing devices. The product of group I is not required for this system. Any manufacturing device may be included in a network.
 - iii. Invention IV applies a maintenance method to the device of group I. The product of group I is not required for this method. The method may be applied to any manufacturing device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Steven E. Warner (#33,326) on 2 September 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elliot L Frank whose telephone number is (703) 305-5442. The examiner can normally be reached on M-F 7-4:30, 1st Friday off.

Art Unit: 2125

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo P Picard can be reached on (703) 308-0538. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-5484.
